If you have installed it, you will be prompted by the following message: The Perl plugin does not automatically install itself. You must do it manually by opening the file perl.exe in the directory plugins/portable/plugin/ and running it. You will then be able to see the dialog box below: You must provide the directory where your Perl library is located and the name of the Perl script you want to run (this script should be installed on your computer as part of a Perl distribution). The Perl plugin can only run Perl scripts. If you want to use it with the Perl IDE for Notepad++, which is very similar to Visual Studio, you will have to download it separately. How to install Open your Windows Explorer. Navigate to your Notepad++ installation directory. If you have multiple copies of Notepad++ installed, navigate to the directory where you want to install the plugin and then follow these steps: Double-click on the plugin_perl.zip file. The installer will launch and ask you to choose a directory where you want to install the plugin. Select the directory and click Next. You must now select the script that you want to execute. By default, the installer will look for the Perl script that was installed with the Notepad++ IDE. If you want to use a different Perl script, click Browse and then navigate to the directory where the Perl script is located. Click Open and then click OK. If you're ready, click Install. Notepad++ Perl Plugin Review Features The Perl plugin includes a very simple module that adds Perl support to Notepad++. This plugin can only execute Perl scripts, but it is a very simple module and it doesn't require you to do anything more than install it. The Perl plugin can be used with Perl versions 5.6.0 or higher and it requires Perl 5.6

What's New In Notepad Portable?

Easy editor for Windows notepad with many additional features and some unique advanced features and attributes. This is the portable version of Notepad++, the alternative to Windows' standard Notepad, and it is mainly used by programmers. Everything that Notepad++ has to offer but wrapped within a portable package Thanks to its portability, Notepad++ doesn't need to be installed. In other words, your Windows registry entries will not be affected in any way. Furthermore, you can place Notepad++ on an external device and directly run it on any computer. So, with Notepad++ you can save sessions, use multiple stream selections, edit rectangular areas, trim trailing space from lines, perform mouse gestures (which cannot be configured) and use hotkeys (which are customizable). Full-featured notepad utility that is mainly intended for programmers Unlike the Notepad utility that Windows comes with, Notepad++ automatically saves the current session and reopens it on the next restart (this behavior can be changed from the "Preferences" menu). The program supports syntax highlighting and folding, automatic completion (for words and functions), the newline format and several searching options (e.g. replacing, dialog-free, incremental, smart highlighting). In addition, you can view the document's properties in the "Summary" area, encode text in several ways (e.g. ANSI, UTF-8), toggle full screen mode and wrapping mode, zoom in and out of text, manually hide lines, use multi-view to compare two documents and make changes, and more. Lightweight, portable and highly capable app that can be used by all categories of users The program uses a very low amount of system resources, comes with a thorough help file and has a user-friendly interface. All in all, Notepad++ is a great application, especially when it comes to writing code. We strongly recommend it to all users, including programmers. 3714 downloads Notepad++ (Compare plugin) Video Guide Easy editor for Windows notepad with many additional features and some unique advanced features and attributes.
