... The `SetTimer()` function will call the specified function at the specified interval. The description of this example. A modal dialog box will open and after 1 minute a message "Printing started" will appear on the form. This will not happen unless you press the "Print" button on the dialog box. When you press on the "Close" button on the modal dialog box, the "Printing stopped" message will appear on the form. The description of this example. Explanation: This example will show you how to make a new event in MS Access, and set a timer to call an event. This is useful when you want to execute an event... This article explains how to convert an image with transparency into an icon. The best way to do this is with Win32 and GDI+ (Graphic Device Interface and Drawing). The article includes a solution in Delphi 7 for creating these icons. The image: In this example, we have an image of a picture of a tree, with a picture of a bush on the top left. Below the tree there is a little hill, with the bottom right corner cut away to reveal a beautiful tree, the background of which is a picture of a garden. The bushes are cut away to reveal a small bush at the top left, with the hill cutaway to reveal a garden. The little hill cutaway reveals a hedge, with a pillar on it. Generate the icon: As the result of using GDI+, the image on the left is converted into an icon on the right, and a small code file is saved as a result. The next figure shows the tree icon on the left and the result on the right. The source code: #include... The code is a text file with the extension of TTF. The file contains several words like: "if, text, means, like, there, we, you," and so on. The file can be stored anywhere on the disk. The program will read each line and print it on the screen in three different colors. The color of the current line will be set by the user. The description of the program: This application is a text-based text adventure game. You are waiting at a square, with the door to the right. You can walk up to the door, get in, walk around and talk to the interesting characters that appear in front of you. Then you can go

Better Password

You can create a secure password in the program's "Random Password" window by clicking on the button that looks like this: . Some of its features are: It's a fast and easy way to generate secure passwords right at the click of a button. It's easy to use, with simple options. You can store the secret password somewhere safe (i.e. in a safe folder on your hard drive, your email account's password manager or any other third-party tool). For Windows XP, there's no such thing as "home editions". It's simply "XP" and "XP Professional". There are no built-in apps for performing these tasks, so they can be done by third-party tools. From where can you learn about them? You can try searching for them online. How can I learn about them? I'd like to quote the following article from this answer: As mentioned in an answer to a different question (How to download a free Windows XP desktop icon?), a possible solution could be to download XP's latest "Home Edition", as well as any required third-party tools/apps (e.g. Outlook 2007) from the Microsoft official site: Download Windows XP Home Edition You can download Windows XP Home Edition from the Microsoft official site. All download links are valid until January 1, 2013. You have to install the program on a hard disk partition/volume. Note that the installation volume cannot exceed 2 TiB (2 Terabytes). Outlook 2007 Outlook 2007 is still available from Microsoft's download site. Concerning third-party tools, maybe the easiest way to learn is by exploring the products page of the Microsoft Download Center. Additional: From where can I learn about them? The following pages from the Microsoft website were used to create this answer: Wikipedia's article about the Windows XP operating system Windows XP is retired Wikipedia: Old versions of Windows Wikipedia: Windows XP Wikipedia: Home editions of Windows Wikipedia: XP Professional Wikipedia: XP Professional Wikipedia: Windows XP Service Pack 3 Wikipedia: Windows XP Professional Why did you choose to use the term "home editions"? The reason I chose to use this term is because the "Home Edition" of Windows is usually the one the majority of people will buy. Also, it's the one I had. aa67ecbc25

Generate random, long and secure passwords the easy way. Modern UI version. Description: Do you have a tiny memory, or are you afraid to use multiple short passwords for one account? Back up your credit card and passwords and give them a secure cryptologic, Try the PASSWORD EXPLODER utility. The program will generate one or more long, complex passwords for your accounts, each one uniquely generated. The passwords are not hard-coded in the app, meaning that they will change after each successful activation. This feature will save you the trouble of trying different passwords for the same account. The program creates one new password every time you start it. This way you can use it for your secure, multiple accounts. Use your mouse or keyboard to select your account and the password you want to use. The program will now scan the entire HDD of your computer and find the respective files. With a click of the mouse, each and every one of the files will be encrypted with a secure password. You can select to encrypt the files later, and each password will be deleted from the computer. This utility works from the earliest Windows versions up to the latest ones. It is completely safe to use, guaranteed. This tool does not change any settings of the machine, nor does it interfere with other programs. It won't show itself on the screen or make the computer any slower. You won't find any download routine or user's manual when you run the program. Every time you activate the password generator, the passwords are randomly and securely generated. This will work like a charm with any account, regardless of the current password length, as long as you have a good enough memory. We guarantee the usage of the software is completely safe. Should you ever have questions or problems with the software, please contact our support center or send us an e-mail.
