English, French, and German Protez® games is a different kind of freemium game. We keep it for free because we want to promote the development of the world's most popular sport, soccer, as well as to show players that if you care about your children's interest in playing soccer, there are ways to support them with no money necessary. Start by creating your own league. Promote players to create their own unique player profile. Watch the league grow. Add match making & more as you go. If you're looking for a little more, purchase Protez Pro™ licenses for a few more tools and maybe even send a billboard to cheer on your team. The present invention relates to a data reproducing system for reproducing data recorded on a medium. A recordable compact disc has been proposed in which data is recorded on a groove or land defined on a disk substrate by irradiation of a laser beam and the recorded data is reproduced by a pickup or the like. This type of disk is convenient for writing and reading data, but has a problem that the reproduced data sometimes contains a large amount of

by Stefan Kopp as well as two of his own designs, the notch holster, and the Vest Aim Forearm Safety. The most amazing aspect of these three knives are how well-designed they are. In fact, the goal was to make each knife as “the best knife it can be” without compromising on function, or in Stefan’s case, unconventional design. Now that I have finished highlighting the benefits of hand-carrying a pocket knife, I would like to touch on a few of the limitations of carrying one. No One Knows You’re Carrying a Pocket Knife Hand-carrying is great. No one knows that you have a pocket knife in your pocket, but it isn’t always as safe as you may want it to be. Being careful to conceal your daggers is especially important when traveling abroad. This is one reason I personally don’t like to wear a large pocket knife outside of my belt. If I did, I would be a bit more discreet. The issue with carrying a fixed blade in the open is that it isn’t concealed as well. I

carry my four-inch Fixed Blade (B-O-I) in a working holster inside my belt. With the business card holder attached to the backside of the knife, it is perfect for concealed carry. The other thing that works in favor of carrying a fixed blade with a fixed site back-up is that there is no real malfunction. If your knife behaves strangely or if you lose it, at least you know that it will still operate. Limitations of Hand-carrying a Pocket Knife I mentioned the other day in an article about the Pokertool Design Team that the hand-carrying limitations of a pocket knife do not provide any particular benefit. In fact, another benefit in having a fixed blade is that there are very few limitations of this type of knife. As I stated before, accidents of pocket knife malfunction are rare. However, the same cannot be said for a hand-carried knife. It could simply disappear in a pocket or even fall out of someone's pants. Once you hand-carry a pocket knife, it is truly your responsibility to insure that it functions and is where you want it to be in the event that you need it. Stay Sharp By Keeping Your Pocket Knives Clean I touch on the issue of keeping your pocket knives sharp in the previous article
