What's new:

(album) Lobster Empire is the debut studio album by Canadian punk rock band The Tea Party. The band was signed to U.S. East Coast label Alternative Tentacles in the United States and London-based label Forbidden Planet for international sales. Lobster Empire was recorded in Salt Spring Island, British Columbia, and produced by Ian Kirk. The album was released in 1990, the same year that the band formed. After re-recordings were released for the 1998 1,000,000 Records box set, the album was re-released in 2001 as a bonus disc for the band's second album, Party Monster. Lobster Empire was a success for the band in music and critical acclaim. Kirk was lauded for his work with the band, and the album was a number one success for the band on the CMJ Radio Music Report. Critical reception for the album was positive, with critics focusing on the album's sound, Kirk's production, and the band's focus on emotional over humour. The band remained a cult favourite. Background and recording Ian Kirk was a producer for Alternative Tentacles' "Underground Sucks" distribution compilation, Tumor Music Volume One, released in 1989. He began forming a relationship with the band's guitarist Chris Murphy after the band's first show, playing bass. Shortly after, the band recruited Murphy's friend, singer/guitarist Derek Smail, following a mutual acquaintance of both band and producer. By 1988, the band was recruiting members to complete their lineup and met future The Tea Party drummer Pat D'Amours in a coffee shop. D'Amours was recruited and confirmed in the band after impressing the members with his technique on the drums. This lineup recorded the first version of the Lobster Empire's debut album in a cabin on a remote part of Salt Spring Island, British Columbia. The band's first album was recorded in one session and took only one day. Production was provided by Ian Kirk, founder of the Montreal-based Alternative Tentacles. The album was recorded with a two-inch 24-track Neve recording system, in which Kirk claims to have mastered the sound of the album using the "old school" compression setting of 122. Due to the lack of a 24-track tape recorder at his studio at the time, Kirk had to simultaneously record to two of his tape recorder's four magnetic heads. Release On June 5, 1990
