Launch the keygen, choose the language, and type in the license key. Choose the option that you want to save the file (even if it doesn't ask you to save it) and it will save it to your desktop. How to remove the activation Just delete the keygen and the license. The license key License numbers are sequential, starting from a count of 1. The first time you run the application you will be asked to enter a license key. You can use this same license key, but if you need to enter another one, just rerun the keygen again and type in a new license key. It uses math equations to generate a single random string of random characters, all from the same alphabet (see below). Alphabet The alphabet used by the key generator is the following: A (0x41) B (0x42) C (0x43) D (0x44) E (0x45) F (0x46) G (0x47) H (0x48) I (0x49) J (0x4A) K (0x4B) L (0x4C) M (0x4D) N (0x4E) O (0x4F) P
