
Samsung 2g Tool V 3.5.0035 !!INSTALL!!

The S4 is supposed to launch on Verizon in the first half of 2011, but we don't expect the phone to be available until sometime in June. A Verizon S4 will have the same unannounced hardware design of the original HTC S4, but have a different chassis/plastic enclosure and a different display. I think a Nexi5 is the best phone to buy in 2011, other phones are too expensive. The one good thing I can say about Samsung today is all their phones no longer come with 3Gb of internal storage! A good phone with only 1Gb of internal storage has no space for a big app or app video. Samsung buy the new Treos, it has what the heck they need and takes care of all these stock problems they had with the apps. What's your favorite movie on Netflix? Sooo, we've all put in some long hours and finally, the long awaited update that finally gives us the ability to change our Netflix favorite movies is here.

Now, we're finally on version 3.1.2 for the Fire TV, so, now you can tell your TV to play whatever movie you are currently watching. The movies you've seen are saved to your video queue in the Amazon Cloud, so, you can continue to watch movies in your queue if it's not there on the Amazon Cloud. You can also switch to a different movie while watching one. You can even search for movies and sort them by favorites, most watched, newest, etc. One of the best parts of this update is being able to change the subtitles in the movie. You can make the subtitles speak in either Spanish or English, and the next time you access the video, it'll be in Spanish or English. Don't forget to subscribe to the YouTube video, as well. When we first got our Netflix app, it would look for a Netflix service in your area, or allow you to set a default service and let you change it later. Now, if you get a netflix that's in a different city or country, the ability to choose a default service is gone. Instead, it always looks for the nearest netflix. This is a pretty bad feature as there's not even an option to re-enable it. The options to save movies to your favorites and queue them are still there. However, if you stop watching a movie, it isn't saved to your favorites or queue. You have to go to the "movies" tab and choose which movies you want to
