What could be the problem? I haven't installed any new packages or libraries in the past few months. I've tried these 2 solutions: Removed wine completely, reinstalled winetricks Removed cmake-2.8.11.1, since it is a gcc4.4 dependency The command git bash still works, other python scripts and bash scripts don't. A: I was able to fix the problem by removing the fontconfig package. th Cir. 1997); see also Toney v. Wood, 77 F.3d 181, 187 (7th Cir. 1996). The district court thus did not err in determining that Thomas had failed to state a claim for relief based on a retaliatory transfer. Thomas's claim for relief based on the denial of access to the courts also fails. As the district court noted, Thomas has not provided any facts to demonstrate that any of his claims he wanted to pursue, including his challenges to the legality of his conviction, were within the scope of his right to access the courts. Prisoners have the right of meaningful access to the courts, Bounds v. Smith, 430 U.S. 817, 822, 825-26 (1977), but we have held that the right includes the right of access to the courts only to challenge their convictions and sentences, King v. Kramer, 680 F.2d 533, 538 (7th Cir. 1982); see also Lewis v. Casey, 518 U.S. 343, 349-50 (1996). Thomas therefore had no constitutional right to access the courts for his claims of discriminatory treatment. 4 Thomas also does not raise any claims regarding the conditions of his confinement. We have recognized that the protections of the Eighth Amendment relating to the conditions of confinement also apply to pretrial detainees. Hall v. Ryan, 957 F.2d 402, 404 (7th Cir. 1992). At most, Thomas is challenging the conditions in the Cook County Jail

Last and foremost, it is implemented in ML (with the 5.4.0 Stumpff's language, but any ML, or even post-standard ML, would do). The resulting ML code is not much bigger than the original C code, and if there are security bugs in the interface code (which, in my opinion, there aren't), then you've got the better code. You don't need to use the C interface code at all, and instead can just write directly into the object tree as you want to. It's really not that hard, and if you haven't written a lot of ML code before, you can probably do it in a day or two. The Ph.D. is in Computer Science, with a minor in Mathematics. The Ph.D. is earned primarily in the second half of the program at the conclusion of the student's research work. The Ph.D. is a full two years in length and encompasses coursework as well as research. The student's research for the Ph.D. will focus on a significant problem in the field of computer science. This problem can be viewed as broadly related to the field in which the student's research will be pursued in the future. A. The research problem must involve the application of mathematics to the design, development and analysis of algorithms. B. A significant amount of the work that is completed in the graduate program will involve the application of mathematics to the real-world problems that must be addressed. A. The research problem must involve the application

of mathematics to the design, development and analysis of algorithms. gambc: gambit-c.spec
